How to Use This Index	2
Subject Index	3
Author Index	10
Article Index	9
Chronological Index	12
New Product Index	14

HOW TO USE THIS INDEX

The 1994 *hp•ux/usr* Cross-Reference Index has five parts:
Subject Index
Article Index
Author Index
Chronological Index
New Products Index

SUBJECT INDEX

The Subject Index is a two-level index. The listings in each level are fully alphabetized within a level:
Main Heading = general subject
Subheading = specific subject
The Subject Index provides access only to subjects, not to article titles. Article titles can be found in the Article Index, Author Index, and Chronological Index. "See" refers the user to a subject heading that is more commonly used for the subject. "See also" refers the user to related subjects. For example:

WAN (See **Networks**)	"See" reference
UNIX (See also **HP-UX**)	"See also" reference
HP-UX	Main Heading
Access Control Lists (ACLs) [5:30]	Second Level [May issue:pages]

ARTICLE, AUTHOR, AND CHRONOLOGICAL INDEX

List of abbreviations:

C	Column	NET	Networks
CD	CD-ROM	PF	Product Focus
COM	Data Communications	PRG	Programming
CON	Conference	REV	Review
F	Feature	SA	Systems Administration
MM	Multimedia	SEC	Security
MSC	Miscellaneous	SM	Systems Management

NEW PRODUCTS INDEX

The New Products Index contains both names of products and the companies producing them. Company names are boldface.

Subject Index

Backup
- Complex Environments [7:36]
- Computer Resources [7:37-38]
- Media [7:39-40]
- Network Services [7:38]
- Policy [7:38-39]
- Problems [7:36-42]
- Product [7:37]
- Recovery [7:36]
- Restore Operations [7:40-42]

CD-ROM
- A2655A Toshiba 3401 Drive [5:64]
- CD-ROM Changer News [7:72]
- Digital Magazines [7:73]
- Do It Yourself Discs [3:56-57]
- Faster Drives [3:57]
- Firewall [5:34-35]
- Interesting Titles [3:54-56]
- Jewel Case [5:64]
- LaserROM/PC [1:52-53]
- Low-Cost Suppliers [3:56]
- More Interesting CD-ROM Titles [84-85]
- MPC 2 Standard [3:57]
- Multiplatform CDs [3:54-57]
- PhotoCD [1:52-53]
- Portables with CD-ROMs [3:57]
- Sorting Printers in LaserROM [7:73]
- Toshiba 4101 Jumpers [7:72-73]

Common Open Software Environment (COSE) [3:50-53]

Conferences
- 1994 North American Conference [1:54-55]
- Common Desktop Environment (CDE) Developers' Conference [3:50]
- Interex '94 [5:66-67; 7:62-67]
- X Conference, Eighth Annual [5:60-62]

Contributed Software Library (CSL) [1:54-55; 3:58-59; 5:68-69; 7:74-77; 9:86-87; 11:56-57]

Data Communications
- Asynchronous Transfer Mode (ATM) [5:43-44]
- Cold Network Installs [9:18-35]
- Connecting Modems to HP-UX Workstations [7:20]
- Data Communications Programs [1:24-32; 7:20-21]
- Fibre Channel [5:45-46]
- High-Speed Modems and uugetty [3:46-49]

High-Speed Modems on 8 x 7 Systems [1:43-44]
Modem Cabling [1:28-30]
Modem Device Files [1:30-32]
Modem Lights [1:28]
Modem Signals [1:25-26]
Network Installs [9:18-35]
Programming Modems [1:28]
RS-232 Devices [7:21-22]
Serial Port Security [7:22]
SLIP [7:21]
Smiley Faces [1:44-45]
TCP Connection [9:38-39]
UUCP [7:20-21]
Workstation Serial Ports [7:16-22]

Hewlett-Packard
E Series Servers [60-61]
HP 1000 Guru [11:20-22]
HP 9000 Fax [1:18-19]
HP 9000 Model 712 [3: 60; 11:42-43]
HP DeskScan/UX [1:19-23]
HP ENVIZEX X Terminals [1:44]
HP RasterOps Videolive [1:15-18]
Model 712 Workstations [3:60-61]
New Software [3:60-61]
PA-7100LC RISC Microprocessor [3:60]
Series 700 Workstation Serial Ports [7:16-22]

HP 9000 [1:15-23, 24-32; 3:29-33, 60-61]

HP-UX
Access Control Lists (ACLs) [5:30]
C Runtime Storage Management [7:24-35]
Capabilities [5:39-35]
Cold Network Installs [9:18-35]
CSL (See **Contributed Software Library**)
Customized Security [3:14-26]
Making Xwpe [9:77-78]
Memory Dumps [3:34-45]
Network Installs [9:18-35]
Paging [3:28-33]
Phantom Files [7:60-61]
SAM (System Administration Manager) [9:70-74]
Series 700 Recovery Tape [11:44-47]
Shell Tricks [80-82]
SIGUNIX [1:55]

Swap Space [5:52-59; 11:47]
Swapping [3:28-33]
Trusted Systems [5:30]
vi [11: 54-55]

Interex
Interex '94 [5:66-67; 7:62-67]
Interex on Internet [1:54-55]

Internet
Career Resources [9:58-69]
Gopher [9:60-62]
Interex on Internet [1:54-55]
Online Career Center [9:62-64]
Telnet [9:64-66]
WAIS [9:62]
World Wide Web (WWW) [9:62, 74]

LAN (See **Networks**)

Modems (See also **Data Communications**)
Connecting Modems to HP-UX Workstations [7:20]
High-Speed Modems and uugetty [46-49]
High-Speed Modems on 8x7 Systems [1:43-44]
Modem Cabling [1:28-30]
Modem Device Files [1:30-32]
Modem Lights [1:28]
Modem Signals [1:25-26]
Workstation Serial Ports [7:16-22]

Multimedia [1:14-23]

Networks
100BaseVG and 100VG-AnyLAN [5:42-43]
Area Control Centers (ACC) [11:24-33]
ASCII Terminals [7:17-18]
Asynchronous Transfer Mode (ATM) [5:43-44]
Backup [7:38]
Client-Server Process Control Over a WAN [11:24-33]
Cold Network Installs [9:18-35]
Emerging High-Speed Networks [5:36-47]
Fibre Channel [5:45-46]
Limitations of Current Networks [5:38-40]
NetDist Server [9:22-30]
Network Installs [9:18-35]
Network Management [9:52-53]
Network Services [7:38]
Oakland Control Center (OCC) [11:24-33]

Photonics [5:46]
Printers and Plotters [7:18-19]
Switching Hubs [5:40-42]
TCP Connection [9:38-39]
Terminal Emulation [7:19-20]
UPS [7:19]
Workstation Serial Ports [7:16-22]

Product Focus
Graphics Workstations [7:78-79]
HP [3:60-61]
Quorum Equal 1.3 [9:88-90]
TAE Plus 5.3 [5:70-71; 9:90]
Visual Thought [11:58-59]

Programming
AWK Programming [5:15-27; 9:82]
C Runtime Storage Management on HP-UX [7:24-35]
Database Objects [7:49-53]
Distributed Object Technology [7:45-49]
Distributed-Object-Technology-Based Application Design [7:44-54]
GUI [7:44-45]
Hyperlinks [7:54]
Object Links [7:52]
Programming Environments [76-78]
Threads [11:34-41]
X (See **X**)

Security [3:14-26; 7:22]

System Administration
Access Control Lists (ACLs) [5:30]
adb [5:48-51]
Bypassing Login Shell [5:33]
Capabilities [5:39-35]
Career Resources [9:58-69]
chroot [5:30-32]
Cold Network Installs [9:18-35]
comp.sys.hp Reorganization [1:42-45]
Desktop Management [9:52-57]
Firewall [5:34-35]
High-Speed Modems and uugetty [46-49]
High-Speed Modems on 8x7 Systems [1:43-44]
Inodes [9:44-50]
Memory Dumps [3:34-45]
Network Installs [9:18-35]
Paging [3:28-33]

Performance and Hardware Testing [7:56-59]
SAM (System Administration Manager) [9:70-74]
Script to Limit Commands [5:32-33]
Series 700 Recovery Tape [11:44-47]
Shell Tricks [80-82]
Suid [5:34-35]
Swap Space [5:52-59; 11:47]
Swapping [3:28-33]
System Parameters [9:44-50]
Trusted Systems [5:30]
Workstation Serial Ports [7:16-22]

UNIX (See also **HP-UX**)
Access Control Lists (ACLs) [5:30]
AUK Programming [5:14-27]
Bypassing the Login Shell [5:33]
Capabilities [5:29-35]
chroot [5:30-32]
Panic [1:34-40]
Suid [5:34-35]

WAN (See **Networks**)

X
CDE Conference [3:50-53]

TAPE AUTOCHANGERS FOR UNATTENDED BACKUP!

Herstal Autochangers are available in various sizes to provide from 48 Gigabytes to over 24 Terabytes of **Unattended Backup** or **Near-Line Archive** capacity. Multiple volume system back-up and file archiving can be performed in an unattended **"Lights-Out"** environment. Our popular autochanger models are the industry's most cost effective with typical capacities of 200GB per replaceable tape magazine. Larger Autochangers feature near-line capacities of up to 900 tape or optical disk cartridges. Media types include 4mm DDS-2 DATs, 8mm Exabyte, DLT, 3480/3490, S-VHS, and AMPEX 19mm tapes.

Herstal Autochangers are compatible with computers that have an available SCSI or SCSI-2 bus or host adapter, and are usable with your "favorite" backup programs by means of Herstal's AUTOREPLY program. Many specialized backup programs are available to control Autochanger advanced features.

The combination of **CA-UNICENTER®** and Herstal **UNISTORE®** provides "mainframe caliber" system management features including protection from both internal and external security violations, as well as, tape volume mis-identification or mis-use. System backup is fully automated and includes the ability to specify both the retention period and number of older copies of files to be preserved. This feature guards against accidental file deletion. Disk storage is conserved by the Automatic Threshold Archiving mechanism which rolls-out "eligible" files as the disk fills. A "demand-driven" transparent restore process automatically recovers needed files. These hierarchal storage management (HSM) features use a high-speed "ballistic" search mode found on most modern tape devices which typically can find information over 100 times faster than normal tape "reads". An unlimited number of tape vaults, each containing millions of tape or optical disk volumes, can be defined and managed for both temporary or permanent archival storage.

System management is by means of "Policies". This "Set & Forget" method ensures that systems are effectively managed with minimal effort. Other areas of system management include: console message monitoring, job scheduling, report distribution control and problem management, including an automated help desk function.

Optional modules are available to provide remote alarms for system or database failures. Automated distribution, installation and version control of software updates is available for networked systems.

CA-UNICENTER and Herstal **UNISTORE** are available for most popular UNIX platforms, client/servers and networks of heterogeneous systems. Please contact Herstal for availability information.

Reflection X is simply better. But why take our word for it?

You be the judge. Try Reflection® X free for 30 days, and you'll see why it's 'simply better.'

You'll discover complete PC-to-UNIX connectivity. Reflection X is the first 32-bit PC X server to include advanced TCP/IP for Windows, award-winning VT320 emulation, and sophisticated applications like FTP client and server and LPR/LPD. All from a single vendor.

You'll find Reflection X is easier to use, too, because it takes full advantage of Microsoft Windows. We've added features like drag-and-drop FTP and configurable panning. Plus, our intelligent client startup lets you launch X clients automatically—right out of the box!

Reflection X delivers top performance, reliability, and offers outstanding technical support.

So call today for your free 30-day evaluation. Because when it comes to 'simply better,' you know best.

For your free 30-day evaluation of Reflection X, call

800-92NETWORK.
